

Small Group Instruction Worksheet

| | Group 1 | Group 2 | Group 3 | Group 4 (optional) |
|----------------------------|---------|---------|---------|--------------------|
| Topic | | | | |
| Group members | | | | |
| Teacher lesson | | | | |
| Hands-on activity/game | | | | |
| Online lesson(s)/ activity | | | | |

Build small-group instruction with Let’s Go Learn’s diagnostic math assessments, which allow you to thoroughly evaluate each student’s mathematical understanding from K-7 foundational skill through Algebra I/Integrated Math, regardless of the student’s actual grade level.

By employing revolutionary adaptive logic, Let’s Go Learn’s math assessments maximize the information obtained about each student while minimizing test-taking time and anxiety. The granular data provides educators and teachers with a comprehensive picture of each learner’s strengths and weaknesses at a skill and concept level. This translates to a prescriptive path for true personalized learning. For students with IEPs, this means providing automated Specially Designed Instruction (SDI) that both eliminates learning gaps and accelerates learning.
